Quad Industries
Creating your connection

Dear,

Quad Industries has a strong reputation as a reliable producer of innovative operator interfaces, control panels, pcb and product assembly. To underline our role as a **trendsetting partner**, we have developed a **fresh house style**, a **powerful slogan** and a **striking logo**. We did all this for a reason.

Our new look emphasises the fact that Quad Industries does everything possible to **lift your projects and products to an even higher level** – and this requires more than just technical **knowledge** and **expertise**. Our professional guidance and commitment guarantee an effective, personal approach from a to z. We do not just provide answers to all your queries, but we also think along with you from the drawing board to the final product and from the smallest function to the total design.

What are the benefits for you?

- Correct advice and top products
- The very best service thanks to our permanent availability
- The utmost comfort and user-friendliness
- The most efficient production method and a sharp price-quality ratio

We are pleased to draw attention to this with a new slogan, a new logo and a new website.
